

Home

Welcome to the cocoondev.org website.

cocoondev.org supports Cocoon-related, non-ASF open source projects by providing

- [Subversion](#)¹ for [source code management](#)²
- [mailing lists](#)³ for (inter)project communication
- [Jira](#)⁴ for [issue tracking](#)⁵
- a project web presence through [Daisy](#)⁶ or static HTML
- a shared [blogging](#)⁷ infrastructure using [Movable Type](#)⁸.

cocoondev.org is sponsored by [Outerthought](#)⁹, the Open Source Java & XML Competence Support Center, and is mainly operated by Steven Noels. If you have questions, or want to host a project at cocoondev.org, I'm just an [email](#)¹⁰ away.
